PROJECTS

HostelFix — Smart Hostel Monitoring System

Node.js · Express.js · PostgreSQL · JavaScript · Python · YOLO · OpenCV · JWT · Socket.IO · Telegram Bot API

- Full-stack hostel management platform with separate dashboards for Admin, Warden, Student, Security and Technician roles.
- JWT authentication, role-based access control, PostgreSQL database and real-time updates through Socket.IO.
- Digital gate-pass system with QR verification and digital signature, along with laundry management.
- Telegram Bot notifications and AI-based CCTV features: face recognition and fire/smoke detection.

AI-Based Network Intrusion Detection System (AI-NIDS)

React · TypeScript · Python · FastAPI · WebSocket · Scikit-learn · Pandas · NumPy · Scapy · SQLite

- Educational NIDS prototype that classifies network traffic as NORMAL or ATTACK using machine learning.
- Trained Decision Tree and Random Forest models on the NSL-KDD dataset.
- React/TypeScript dashboard with a FastAPI backend, WebSocket live updates, alerts, traffic history and charts.
- Optional local packet-metadata capture with Scapy/Npcap, stored as traffic and alert records in SQLite.
